

CF210-2 AS*

CF210-2 AS is a Premium Grade CHEMFAB® PTFE-coated woven glass fabric with anti-static properties. It provides excellent release properties as well as chemical and wear characteristics over wide temperature ranges where static dissipative properties are required.

CF210-2 AS is typically used as a fuse pressing belting material where anti-static performance is required, and also as a release sheet for use in the production of wood and composite panels.
