

CF3460

CF3460 is a heavy duty CHEMFAB® belting fabric for use in demanding, high temperature environments where outstanding release characteristics are required. It is composed of a high quality PTFE coating on a woven glass fibre substrate. Its strength and rigidity make it ideally suited for use in large belts. CF3460 is similar to CF3450 except that it has a higher coated weight. Both products have a characteristic of surface texture.

CF3460 is typically used in carpet and floor covering industries, particularly where rubber or PVC backings are being processed.

Typical Properties

Property	Value	Value	Test Method
Weight	g/m ²	1140	FTMS 191A-5041
Thickness	mm	0.630	FTMS 191A-5030
Tensile Strength	N/cm	700 x 900	FTMS 191A-5102
Trap Tear Strength	N	120 x 180	FTMS 191A-5136
PTFE Content	%	48	-
Temperature Resistance	°C	-150 to +260	-
Standard Width	mm	2350	-

The fabrication of a conveyor belt from the above product requires the fabric to be cut and squared. This will involve a reduction in width, and thus the exact minimum width can only be confirmed on receipt of any enquiry with belt dimensions.
