

## CLF11 Blue/Black\*

CLF11 Blue/Black is a flexible, non-porous, CHEMFAB® PTFE (Teflon®) composite that combines the non-stick features of multi-layer fluoropolymer cast films with the mechanical strength of PTFE coated glass fabrics. It has a blue cooking side which is specially designed to provide longer life and more durable non-stick release performance than other laminates or coated products in contact grilling applications. The blue coloured cooking face is specifically designed for easy recognition in food processing plants in the event of mechanical damage.

It is specifically designed for use in food applications, e.g. contact grilling and fat frying.
