

SRF206 Copper

CHEMFAB®

SRF206 Copper

SRF206 Copper is a super smooth, dimensionally stable PTFE-coated glass cloth that provides superior release properties and excellent chemical resistance against a wide range of temperatures.

This product has been especially designed to provide increased longer life and reduce maintenance time in demanding application of UPVC profiles welding. Due to its superior release properties, SRF206 Copper significantly outperforms other PTFE coated fabrics used for covering the welding platens, both in number of pulls and ease of cleaning.
